

## Privacy Policy

---

This document describes the personal information Avalanche Boarders gathers, how this personal data is used and where it is stored. When enrolling the member to be member must agree to this policy. Avalanche Boarders gather the following personal data. Per data we gather the purposes can be found underneath.

1. The name of its members
  - (a) Names will be used for interaction with its members
  - (b) Member's names will be distributed to third parties; partners of Avalanche Boarders. These partners give members advantages (discounts etc.) and thus need the members name in order to check if they are really Avalanche Boarders members. The partners can be found on the website.
  - (c) Names of old-members will be kept so they can be invited when a reunion or lustrum is organised.
2. The email addresses of its members
  - (a) The email is needed to contact the members
3. The address of its members
  - (a) In case of emergencies (bringing an injured person home or picking up their belongings)
  - (b) To distribute printed promotion material
4. The phone number of its members
  - (a) The phone number is needed to contact the members
5. The date of birth of its members
  - (a) Avalanche Boarders wants to know the age of their members
  - (b) Avalanche Boarders likes to congratulate members on their birth date
6. The gender and T-shirt size of its members
  - (a) Avalanche Boarders needs to know the gender and the T-shirt size of its members to order its merchandise accordingly
7. The sport card number of its members
  - (a) Avalanche Boarders members are required to have a sport card by the SSC. To check if every member has a sport card Avalanche Boarders has to provide members names plus corresponding sport card number to the SSC.
8. Avalanche Boarders keeps track of the debt of members to the association.
  - (a) Avalanche Boarders pays the buses and other facilities in advance. Members who use these facilities will be in debt to Avalanche Boarders. Avalanche Boarders needs this information to collect the depths.
9. The activities a member enrolls in on the website.
  - (a) Avalanche Boarders need to know how many people are joining activities. This data is needed for the transport.

- (b) Avalanche Boarders need to know who are joining activities. This way it is easy to check if the group is complete and if not the members who are not present but enrolled can be contacted.
- (c) Avalanche Boarders keeps this data on the website to check who joined past activities. This data is needed to keep track of the depth when the bus is used.
- (d) Avalanche Boarders also keeps this data to be able to contact members who joined the activity when this is required. This can be required when Avalanche Boarders wants to ask if someone would like to write something about the activity for the website or when an issue occurs where the people who went to the activity need to be contacted.

10. Avalanche Boarders makes pictures and videos during Avalanche activities.

- (a) Avalanche Boarders wants their members to have a memory of some of the activities we organise in the form of pictures and videos.
- (b) Avalanche Boarders want to share their activities on social media for promotion purposes.

In order to store the data Avalanche Boarders gathers from its members it makes use of cloud storage solutions. The cloud services that are used to store members' data are listed below, along with the types of data that are stored on these services and who has access to them.

1. Bsetmedia

Bsetmedia is the company that hosts the Avalanche Boarders website. The data stored on the website can be accessed by the board and people who received permission from the board. The website is used to store the following data:

- (a) Name
- (b) E-mail address
- (c) Activities a member is enrolled in

2. Dropbox

Dropbox a company that offers a cloud storage solution for free. It is used to store the documents and files used by the board as well as the committees of Avalanche Boarders. The dropbox is split into two folders, one to which only the board has access, and one to which all committee members have access. The following data is stored using dropbox:
